

Q3) What are the main differences between traditional (Waterfall) and iterative (agile) methodologies?

waterfall (traditional)	agile (iterative)
• requirements docs.	just-in-time informal requirements.
• resistant to change	change is expected.
• potentially large team size.	teams of 3-9 people.
• multiple phases, eventual delivery.	working software each sprint.
• contract says what we build, deliver.	contract is a lot closer to T&E.

ProMate

Q4) What are the key components of the scrum framework in Agile methodology?

product owner.

scrum master.

development team.

product backlog.

sprint.

sprint planning.

daily scrum.

sprint review.

sprint retrospective.
